

About SEWP

The NASA SEWP (Solutions for Enterprise-Wide Procurement) GWAC (Government-Wide Acquisition Contract) provides the latest in Information Technology (IT) products and services for all Federal Agencies and their approved contractors. Providing the latest in commercial ICT/AV products and services, the NASA SEWP contract vehicle has an outstanding track record of serving up fresh technology for Federal Agencies. SEWP is a GWAC consisting of over 140 pre-competed Prime Contract Holders, including more than 110 small businesses.

Note that each competed group has the same scope which provides overlap among all contracts and groups.

The SEWP contracts offer a vast selection and wide range of commercial advanced technology as well as product-based services such as installation, maintenance and other services related to in-scope products to all Federal Agencies (including Department of Defense) and their approved support service contractors. SEWP offers low prices and the easiest and fastest quoting and ordering procedures using pre-competed contracts.

As of October 1, 2020, the SEWP surcharge for all orders is 0.34%. The fee is included in the price of all products and is not separately listed on quotes. It is the Contract Holder's responsibility to pay the fee from their quoted product prices.

There is a requirement that all SEWP Delivery Orders be routed through the NASA SEWP Program Management Office (PMO) to ensure all ordering information is complete, accurate and in scope with the applicable contract. However, NASA does not issue orders for other agencies under the SEWP contracts, and other Federal Agencies do not send funds to NASA. Each SEWP Delivery Order is funded and issued to the SEWP Prime Contractor by a Contracting Officer at the ordering Federal Agency.

Fair Opportunity

FAR 16.505(b) (1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding \$3,000 and issued under multiple award contracts. The FAR states that the method to obtain fair opportunity is at the discretion of the CO and that the CO must document the rationale for placement and price of each order. The SEWP online RFI/RFQ tool is the recommended method to assist in this activity and to augment the required decision documentation. The SEWP RFI/RFQ tool will automatically include the Contract Holders within a selected Group or based on a suggested source.
